Noble Solutions' Time-of-Use Pricing:

Time-Of-Use (TOU) pricing is a variable price structure that charges for energy depending on the time of day and the season the energy is used. With TOU pricing, your bill will be determined by both when you use electricity and how much you use.

Noble Solutions' energy products are individually tailored to each customer to capture the benefits of retail competition. We offer our customers specific structures to accomplish their procurement objectives within their particular risk tolerances. This includes customer crafted TOU pricing either fixed price, index price or a combination of both. Please work with your Noble Solutions Sales Representative to tailor a TOU pricing plan that meets your needs.
